

Shaan Technologies' mission:

- Provide energy efficient & environmentally friendly LED lighting and solar panel products to our customers
- Use our innovative skills to address our customer's specific needs
- Offer the correct and most beneficial solutions for our customers
- Provide expert technical assistance to our customers

Let the Shaan Technologies team present solutions for your lighting and power needs with clean LED Lighting products and energy safe Solar Panels. Both provide you energy efficiency and savings, reduced maintenance and long-term sustainability with safe & healthy lighting.

Electromechanical Assembly Contractor & Solar Panel Manufacturer

Shaan Technologies (Pvt) Limited is ISO 9001:2008 certified as well as RoHs (Restriction of Hazardous Substances) compliant, and is a leading Pakistani manufacturing company based exclusively in Karachi. It is engaged in manufacturing and assembling a wide range of electronic circuits & systems for leading OEMs (Original Equipment Manufacturers) around the world.

Shaan Tech is an affiliate of LEDtronics, Inc., which has been a leader in innovations and solutions for LED lighting products since 1983. Pervaiz Lodhie, President of LEDtronics, established Shaan Tech in 1998 to both create employment in Pakistan, as well as provide skilled product assembly for his North American manufacturing facility. Shaan Tech is an acknowledged high-quality, high-tech LED lighting manufacturing company with a well-trained and experienced workforce, led and managed by a professional management team.

Products & Services

Our Core competencies are:

- Contract Manufacturing
- Electro-Mechanical Assembly
- Component Soldering
- Wire Stripping, Crimping, Harnessing
- Thru Hole PC Board Assembly
- Miniature Spot Welding
- Dip Soldering
- SMD Soldering
- Ink Jet Marking

Shaan Tech is now also manufacturing Solar-Powered lanterns and Photo-Voltaic solar panels.

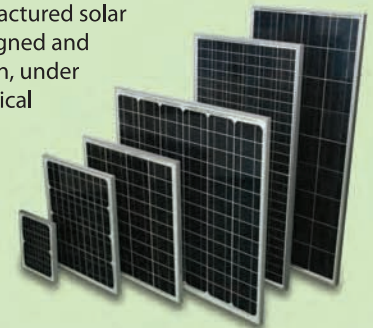

Eco Friendly Organization

Shaan Tech is the first industry in Pakistan to replace energy inefficient and Mercury-containing fluorescent tube lights and lamps with energy efficient, non-toxic, reduced maintenance and longer-life cycle LED lights. Presently, 80 percent of our operational lights are LED based. A 1.5 kilowatt solar panel bank provides sufficient power to drive LED lights. By using solar-powered LED lamps, Shaan Tech not only reduced their electricity bill, but is also doing its small part in support of the Going Green movement.

Solar Panel Manufacturing

From its very first day, Shaan Tech has strived to promote a positive image of Pakistan. Maintaining this philosophical mission, Shaan Tech launched a new production line dedicated to the manufacturing of Solar Panels in 2011. This production line is capable of producing megawatt Solar Panels covering a wide megawatt range. Shaan Tech's manufacturing business decision will result in an economic climate that will both directly and indirectly create a positive impact on the employment level in Pakistan. Every Shaan Tech manufactured solar panel is completely designed and manufactured in Pakistan, under guidance and technological support of LEDtronics in the USA.

Manufacturing and Assembly of a Wide Range of Electronic Circuits & Systems
